Jamal Dabas

dabasjamal@gmail.com 2108440871 San Antonio, TX in/jdabas https://jamaldabas.com/

Education

University of Texas at San Antonio
Bachelor's of Science in Computer Science

- **Summa Cum Laude**
- GPA: 3.97/4.00

Skills

Languages: C#, Java, Typescript, JavaScript, Python, SQL, C/C++, Apex, HTML/CSS

Backend & APIs: .NET Core/Framework, Node.js, Spring Boot, Flask, Django, FastAPI, REST APIs, GraphQL, SOAP, JDBC

Frontend & Templating: React, Angular, Vue, Liquid

Cloud & Databases: AWS, Azure, GCP, Firebase, Cosmos DB, DynamoDB, PostgreSQL, Kusto, SQL, NoSQL

Architecture: Distributed Systems, Microservices, Event-Driven Architecture, SOA, System Design, Automation, Agile/Scrum

Tools & Platforms: Git, Github, GitLab, Azure DevOps, Docker, Kubernetes, Datadog, Playwright, Customer.io, Cursor, Maven, Gradle, Bash

AI & LLM: OpenAI API, Anthropic Claude, Model Context Protocol (MCP), Prompt Engineering, Agentic Workflows

Awards

Presidential Scholarship
University of Texas at San Antonio

Professional Experience

Wealth.com
Software Engineer II
07/2025 – Present

- Designed and built a payments management system processing over **$1 million in monthly transaction volume** for notary and deed services.
- Led the overhaul of the document management platform used by all advisors and clients, adding a new interface, AI-assisted document detection, and custom tagging.
- Developed transactional and campaign emails in Customer.io, increasing document completion and customer retention by over **30%**.
- Designed idempotent order workflows that prevent duplicate charges and lost documents from third-party retries.
- Built serverless workflows for legal-document preparation, notarization, billing, and delivery.
- Investigated and resolved production incidents using Datadog alerts, logs, and metrics.
- Expanded unit, integration, and Playwright visual regression test coverage.
- Primary Technologies: Typescript, React, Node.js, GraphQL, Liquid, AWS Lambda, DynamoDB, Step Functions, C#/.NET, Datadog, Playwright, Claude, Cursor, and MCPs.

Microsoft
Software Engineer
03/2022 – 01/2025

- Built backend automation for Azure datacenter equipment workflows, reducing setup time by **80%**.
- Developed an early-closure alert that reduced premature ticket closures by **95%** and protected hardware-delivery timelines.
- Led migrations of .NET worker services on Azure, resolving operational bottlenecks and improving service reliability.
- Maintained and improved a distributed platform of more than 30 microservices while resolving incidents affecting global supply-chain operations.
- Primary Technologies: C#, .NET, Azure, REST APIs, Angular, TypeScript, PySpark, PowerShell, Kusto, Cosmos DB, Azure DevOps

USAA
Software Engineer III
09/2020 – 02/2022

- Built Java Spring Boot APIs and React/Salesforce features supporting customer-service chat workflows.
- Remediated a critical security vulnerability that exposed credentials in chat URLs using Salesforce Apex.
- Resolved a production archival defect affecting **80%** of applicable member cases using Apex and Python.
- Primary Technologies: Java, Spring Boot, Salesforce, Apex, React, Python, Gradle, GitLab, Docker, Kubernetes
